SUPPLEMENT TO
REPORT NO.

50X1-HUM

THE FOLLOWING INFORMATION APPLIES TO THE NATIONAL DEFENSE
OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT OF
1950, CH. 30 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION
THEREOF TO ANY PERSON OR A TRANSMISSION PERSON IS PRO-
HIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The following electric motors are produced in the Rade Koncar Factory:
 - a. Hydro-generators, three phase, synchronous with a power of 2,200 kilowatt amperes. Two such generators are reportedly installed at the Mariborski Otok hydro-electric plant, one at the Moste hydro-electric plant and one at the Rogatica hydro-electric plant. Numerous other hydro-generators of this type are presently being produced in factories.
 - b. Six types of electric motors with a power of 34 to 74 kilowatts.
 - c. Electric motors of 0.5 kilowatts to be used in the textile industry.
 - d. Electric motors of undefined power for cranes. The electric cranes have a capacity of 1,000 kilograms. To date, twenty-eight such electric motors for heavy cranes are said to have been completed.
2. The section which manufactures telephones is largely producing inductor telephones modelled after the German type, to meet Army needs. The first such telephone was produced by the factory in February 1948 with the assistance of German specialists, formerly prisoners of war. During 1948 production was commenced on an assembly line basis. The factory has a special military section.

50X1-HUM
50X1-HUM

Comment: [redacted] the Rade Koncar Factory produces eleven types of motors for cranes. The Yugoslav press has reported, in addition, that this factory produces automatic telephone stations, but no information has been obtained which notes the existence of such production.

Comment: The following pictures
